

SyncPak Mobile for the PocketPC Installation

Summary

SyncPak Mobile/Pocket PC delivers SyncPak Event Updates directly to your PocketPC calendar with an 802.11, Bluetooth, LAN or Modem connection, you get updates wherever you go -- instantly.

SyncPak Mobile for the PocketPC cuts the strings from your desktop computer. You are able to get events and schedule online over a wireless (or wired) connection directly into the PocketPC built in Outlook Calendar.

SyncPak for the PocketPC is an Addin for the PocketPC Outlook and delivers event updates to your PocketPC Outlook Calendar. So now you can get events data right to your PocketPC Outlook Calendar.

For example, with the Econoday module, you can get the latest economic event information right into your PocketPC Outlook Calendar. So when the Leading Indicators report comes out at 10:00am, it gets put into your PocketPC Outlook Calendar at 10:00am with analysis and commentary ready for you to examine at your leisure.

There is no need to learn any new programs or interfaces to use SyncPak Mobile, since everything is done in your Microsoft PocketPC Outlook Calendar that you use everyday.

What's Included

The Economic SyncPaks follow the following events ready to be included in your calendar when they occur.

Before the event happens you will get a Consensus, after the event happens you will get the Actual numbers and the Highlights of the event, all being delivered right your calendar.

Installation

1. Download the setup program from <http://www.syncpak.com/productppc.html>.
2. Connect your PocketPC device to your computer.
3. Run the setup program
4. Go to your PocketPC
5. If your PocketPC Calendar is running exit from it.
6. Run your PocketPC Calendar.
7. Choose Tools from the PocketPC Calendar's main menu.
8. Choose SyncPak Mobile

9. If this is your first time running the software, it will ask for your SyncPak account number. For this you would enter your email address.

You are now ready to grab events from the internet.

Getting new Events into your PocketPC Outlook Calendar

1. Make sure your PocketPC has a connection to the internet.
2. Get into the PocketPC Calendar program.
3. Choose Tools from the PocketPC Calendar's main menu.
4. Choose SyncPak Mobile
5. Press the OK Button.

SyncPak Mobile will go out over the internet and grab the newest event updates and import them into your PocketPC's Calendar.

Customizing SyncPak Mobile

From the SyncPak Mobile choose the Options button.

Options - General Tab

User Name - The email address you entered when first loading the software

SyncPaks Loaded - These are the SyncPak modules that are loaded on your system.

To delete one press the delete button.

To Edit (if there are any features to modify) press the Edit button.

Ignore Past events – If checked, SyncPak Mobile will not import any events into your PocketPC Calendar that occurs before the current date.

If you are running the an older version of the PocketPC, you will have the option of configuring a Proxy option is your network requires it. Newer versions of the PocketPC take care of this automatically and these dialogs will not be shown.

Options - Proxy1/ Proxy2 Tab

Usually these Proxy options are not set.

User Proxy – If checked will try to use your network's proxy server.

UserName / Password - Your authentication (if needed) to use on your local proxy server.

Proxy Information

Address - IP address if needed of your proxy server.

Port - Port number that your proxy server is using.

Corporate Event Definition

Along with the Financial events included in the Financial SyncPak Modules, there is also a database of corporate announcements customizable by ticker, including earnings conference calls, analyst and management interviews, product news and shareholder meetings. Coverage includes companies traded on NASDAQ and NYSE, and some OTC stocks.

To customize which companies you get information about.

1. Run your PocketPC Calendar.
2. Choose Tools from the PocketPC Calendar's main menu.
3. Choose SyncPak Mobile, Click on Options in the main screen.
4. Under "SyncPaks loaded", pull down the menu until you see Corporate Events.
5. Click on the Choose Button.
6. If the "Get New List" Button appears, make sure your PocketPC has a connection to the internet and press the "Get New List" button.
This will download the newest Ticker Symbols list from the internet.

Adding Ticker Symbols to your watch list.

Enter some text in the "Find Ticker Symbol" edit box, and press the Search Button.

You should get some search Results in the listbox, highlight the company you want to receive information about and press "Add >>".

To see your watch list of Tickers press the "My Tickers" Tab on the top of the screen.

Here you can also delete Ticker Symbols currently in your watch list by highlighting the selection and pressing the "Delete >>" button.
